

ProcureIQ – Product Requirements Document

Product Overview

ProcureIQ is an AI Procurement Analyst that helps procurement teams evaluate supplier quotations using AI-powered recommendations and natural language queries.

Problem Statement

Procurement teams manually compare quotations across pricing, delivery and commercial terms. Existing comparison tables organize data but don't provide decision intelligence.

Goal

Build an AI assistant that recommends suppliers, answers procurement questions, highlights risks, generates procurement summaries and exports reports.

Scope

In Scope: 2 sourcing events (Corporate Laptop Procurement, Industrial Safety Equipment Procurement), 5 vendors, 15 line items, AI recommendation, procurement chat, summaries, PDF/Excel export.

Out of Scope: RFQs, OCR, Contracts, ERP, Invoices, Live pricing.

Personas

- Procurement Manager
- Head of Procurement

Workspace toggle changes Suggested Questions and Procurement Summary.

UX Principles

Three-column enterprise layout, clean UI, whitespace, AI recommendation always visible.

Primary #0070BB, Background #FFFFFF, Page #F8FAFC.

AI Behaviour

Responses follow: Answer → Evidence → Recommendation → Trade-offs.

Only answer from available dataset.

Dataset

15 line items, 5 vendors, fields: Item ID, Name, UoM, Qty, Annual Qty, Order Type, Unit Price, Total Price, Payment Terms, Incoterms, Lead Time, Commercial Remarks, Attachment, Technical Compliance, Historical Rating, Risk, Certifications.

Success Metrics

Recommendation <2 min, AI response <10 sec, Question success >90%, Summary <30 sec, Export 100%.
